Volume 247 February 1993

CONTENTS

On the nonlinear development of the most unstable Görtler vortex mode. James P. Denier and Philip Hall *page* 1

Flow in deformable porous media. Part 1. Simple analysis. Marc Spiegelman 17

Flow in deformable porous media. Part 2. Numerical analysis – the relationship between shock waves and solitary waves. Marc Spiegelman 39

On some kinematic versus dynamic properties of homogeneous turbulence. L. Shtilman, M. Spector and A. Tsinober 65

The wake from a cylinder subjected to amplitude-modulated excitation. M. Nakano and D. Rockwell 79

Boundary interactions for two-dimensional granular flows. Part 1. Flat boundaries, asymmetric stresses and couple stresses. Charles S. Campbell 111

Boundary interactions for two-dimensional granular flows. Part 2. Roughened boundaries. Charles S. Campbell 137

Stability of a ridge of fluid. Leslie M. Hocking and Michael J. Miksis 157

Oscillatory flow in a stepped channel. O. R. Tutty and T. J. Pedley 179

Trapped internal gravity waves in a geostrophic boundary current. Hong Ma 205

The motion and stability of a vortex array above a pulsed surface. E. Acton and M R. Dhanak 231

Hydrodynamic instabilities in cylindrical thermocapillary liquid bridges. H. C. Kuhlmann and H. J. Rath 247

The three-dimensional evolution of a plane mixing layer: pairing and transition to turbulence. Robert D. Moser and Michael M. Rogers 275

Spanwise scale selection in plane mixing layers. Michael M. Rogers and Robert D. Moser 321

The growth of large scales at defect sites in the plane mixing layer. T. Dallard and F. K. Browand 339

On the instability of hypersonic flow past a flat plate. Nicolas D. Blackaby, Stephen J. Cowley and Philip Hall 369

Nonlinear effects in the dynamics of shape and volume oscillations for a gas bubble in an external flow. S. M. Yang, Z. C. Feng and L. G. Leal 417

Mode interaction models for near-wall turbulence. Sanjeev Sanghi and Nadine Aubry 455

Stability of the interface in co-extrusion flow of two viscoelastic fluids through a pipe. Kang Ping Chen and Yi Zhang 489

Mode interaction models for near-wall turbulence. Sanjeev Sanghi and Nadine Aubry 455

Stability of the interface in co-extrusion flow of two viscoelastic fluids through a pipe. Kang Ping Chen and Yi Zhang 489

Effects of Görtler vortices, wall cooling and gas dissociation on the Rayleigh instability in a hypersonic boundary layer. YIBIN FU and PHILIP HALL 503

On the 'δ-equations' for vortex sheet evolution. JAMES W. ROTTMAN and PETER K. STANSBY 527

Infragravity waves induced by short-wave groups. HEMMING A. SCHÄFFER 551

On a uniformly valid model for surface wave interaction. YEHUDA AGNON 589

The topographic control of planetary-scale flow. ANDREW W. WOODS 603

Properties of a bidisperse particle–gas suspension. Part 1. Collision time small compared with viscous relaxation time. V. KUMARAN and DONALD L. KOCH 623

Properties of a bidisperse particle–gas suspension. Part 2. Viscous relaxation time small compared with collision time. V. KUMARAN and DONALD L. KOCH 643

Transonic nozzle flow of dense gases. A. KLUWICK 661

REVIEWS

Energy Dissipators and Hydraulic Jump, by W. H. Hager 689

Perspectives of Nonlinear Dynamics, by E. Atlee Jackson 690
